NAILDRIVER'S SPLENDID ORE

Thirty-five Tons Net the Company About \$2,800.

SILVER SHIELD TUNNEL IN ORE to me.

RICH ROCK FROM ST. LOUIS Business Was Light and Prices Fair PROPERTY.

The initial shipment of ore from the Naildriver company's property, consisting of approximately thirty-five tons, was marketed yesterday. Manager Rood had left the office when figures were asked for, and when seen later he was able only to give them in round numbers. He said the lot was sold on assays showing about 150 ounces silver and 40 per cent lead, the company netting approximately \$80 per ton, or close to \$2,800.

If those figures do not satisfy the shareholders they will be a hard lot to please. That is about as fine ore as was ever shipped in quantity from the camp and at once places the Naildriver in the same class as the Quincy early in its career.

Whether shipments are to be continued regularly or not, Mr. Rood did not say, but the presumption is that no particular effort to mine will be exerted until the big working shaft has reached the level of the ore bodies will, undoubtedly, be continued through the old tunnel until such time as the shaft has been completed that deep, and by that time sufficient lexicon, and by that time sufficient exterior, and interest in the proceedings on change yesterday was anything but inspiring. Trading was largely professional and the prices made were, in the face of conditions prevailing, wery good. During the entire day 33.95 shares of stock, with a selling value of \$15,675, changed hands.

All of the more active performers held quite firm, and in a few instances slight and a few instances slight and the prices made were, in the face of conditions prevailing. Very good. During the entire day 33.95 shares of stock, with a selling value of \$15,675, changed hands.

All of the more active performers held quite firm, and in a few instances slight and a few instances slight and the prices made were, in the face of conditions prevailing. Very good. During the entire day 33.95 shares of stock, with a selling value of \$1,675, changed hands.

All of the more active performers held quite firm, and in a few instances slight and a few instances slight and selling value of \$1,67

through the old tunnel until such time as the shaft has been completed that deep, and by that time sufficient ground will have been blocked out to warrant production on a good scale.

DOWN FROM SNAKE CREEK.

Chas. Buehler Tells of Developments

at St. Louis and Other Ground. Charles Buehler, superintendent of the Steamboat company's Snake Creek property, came in from Heber City yesterday morning with samples of very rich looking carbonate ore from the St. Louis group of claims which he and associates are operating. The ground lies between the Wolverine and formerly owned by F. W. Hayt and E. Levigneur. Mr. Buehler bought the latter's interest and took a lease and bond on the portion held by Hayt. Mr.

bond on the portion held by Hayt. Mr. Buehler and partners recently started a tunnel which has since been driven thirty feet. For the entire distance they have been following a vein that holds a high-grade streak of ore averaging about six inches wide.

"The vein lies rather flat at the present time," said Mr. Buehler yesterday, "but we feel sure that it will straighten up in the next few feet and when it does we look for the ore streak to widen out and amount to something. I am having samples of the ore assayed and from my knowledge of the rock in that section I am confident it will run not less than 200 ounces silver to the ton."

while he is operating within a very short distance of the Wolverine, Mr. Buehler says he knows but little of what that company is doing. The men at that property do not bother him and he has not attempted to learn how their property is panning out, though he thinks they have a good thing.

Lower down, at the Park City Gold & Silver company's property, he says Superintendent Free is making nice headway in the sinking of his shaft.

Superintendent Free is making nice headway in the sinking of his shaft. The whim works like a charm and from the character of the material coming from the bottom of the shaft, he considers that it is only a matter of going down till the company develops a mine. Mr. Buehler looks for verops a finite. Mr. Buenier 100ks for shares. New York, 1,500@28%c; 2,000@28c; 500@ 27%c. Total, 4,100 shares. Wabash, 300@43c; 200@43%c. Total, 500

SILVER SHIELD TUNNEL.

Good Ore Is Now Being Driven Through. While there has been no display

made over it, it is a fact, neverthe-less, that the showing in the face of the big tunnel being driven to de-velop the Silver Shield property at depth is such as to practically guar-antee that the showing made in the upper workings will be more than disupper workings will be more than dis-counted below. When Manager Jo-seph returned from the mine Monday night he brought in a sample of ore that was mighty good to look at. At the office of the company he was chided for having brought in all the ore in sight, but the only reply he vouch-safed was that in breaking down the chunk he brought in with him he had dislodged about 200 rounds of the same dislodged about 200 pounds of the same kind of material.

kind of material.

The face of the tunnel is yet something like 100 or 125 feet from the end lines of Shield territory, but at the rate of progress now being made it will be but a short time till it is reached. Particulars as to the width of the vein or the amount of ore in it other than or the amount of ore in it, other than as stated, are not obtainable, as Mr. Joseph has gone out to the Galena, but those who have seen the ore mentioned are unanimous in the opinion that the Silver Shield will more than

TRAPPER'S PRIDE HIGH-GRADE. Eighty-foot Ledge of Milling Ore De-

yelops Rich Chute. Arrivals from Kimberley, Gold Moun tain district, report that a very rich ore chute has just been encountered in the Trapper's Pride property. After doing over 2,300 feet of development work, it now seems positive that the stockholders are going to reap their re-ward. The ore bodies in this property

ward. The ore bodies in this property have been found to average more than eighty feet wide and now that high-grade is making its appearance in generous quantity the management feels that success is all the more certain.

The developments on the Fish Creek side of the district are daily becoming more important, and it now seems reasonably certain that it will turn out fully as rich as the Annie Laurie side of Gold Mountain.

BOOM FOR DEEP CREEK.

Railroad Men Reported to Be Gain-

ing Footholds in the Camps. As an indication of what is likely to happen in the way of building a raff-road in the direction of Deep Creek this year, it is stated on unimpeachable authority that some of the local railroad operators are gaining strong footboids in the western region. Within the past few days shareholders in in the past few days shareholders in the old Yellow Jacket company, which owns a fine block of ground at Dug-way, have sold to certain well-known and prominent railroad officials many The articles of incorporation of the thousands of shares. It is declared Palo Duro Mining company were yes

Is there money to be made in mining stocks? Well, if there was not, Is there money to be made in mining stocks? Well, if there was not, there would not be a rich man or woman in Utah today. Do you think they got rich starting on nothing and drawing 4 per cent interest on it? All you need do to get rich is to put your money into the ground—in the right place. Of course, the ground is big and there are barren spots. Avoid these. That's all you need do. What's in a name? Nothing. Don't buy the name. Select first the locality, then the ground. Then buy the stock, no matter what the name of the corporation may be. A name may be worth something on the market, but not at the smelter.

N. A. PAGE, Walker Bank Building.

these purchases are being made with a view to placing the control of the property in the hands of the men who are in a position to know what the policy of the transportation companies is.

"If ground out there is looked upon as a buy by railroad men at this time," said an operator in that section yesterday, "It behooves all the claim owners from Dugway to Ibapah to get down to work and prepare for the advent of the iron horse and the boom its arrival is sure to launch. These investments by railroad men look good to me."

terday filed with County Clerk John James. It has a capitalization of \$50,000, divided into 500,000 shares, valued at 10 cents each. The company will operate in the Clifton mining district, Tooele county. The officers are C. H. Nelson of Roswell, N. M., president and treasurer; E. W. Hall, vice president; Frank T. Burmester, secretary, both of Salt Lake.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornleg & Co., amounted to \$112,500, as follows: Silver, lead, gold and copper ores, \$47,000; have builting the county. The officers are C. H. Nelson of Roswell, N. M., president and treasurer; E. W. Hall, vice president; Frank T. Burmester, secretary, both of Salt Lake.

Ore and bullion settlements in this city yesterday, as reported by McCornicg & Co., amounted to \$112,200, as follows: Silver, lead, gold and copper ores, \$47,000; base bullion, \$65,200. Metal Market.

Silver, 48½c per ounce, Copper, 12%c per pound; New York, \$13.37½@13.62½ per 100 pounds, Lead, \$3.50 per 100 pounds,

Mining Notes.

Three cars of ore from the Horn Silver will be on the market today.

Another carload of ore from the Wild Bill company's Beaver county mines reached the market yesterday. The Taylor & Brunton sampler was yes-terday in receipt of six cars of ore from Tintic, three from Frisco and one from Milford.

The old board of directors of the Bul-ion-Beck Mining company has been cho-en to manage the company's affairs for nother year.

Reports from camp are to the effect hat the Little Chief is looking better very day. It will not be long till it joins be shippers. the shippers.

A. D. Moffat, general superintendent of the big bimetallic mill at Granite Mountain, Mont., came down from the north yesterday on a short business trip.

ON DOWN GRADE

Active Liquidation on the Stock Market.

LOSSES ALL ALONG THE LINE

THE BEARS ARE IN CONTROL OF THE SITUATION.

New York, March 3 .- Active liquidation set in the stock market today, resulting in price losses at one time of from 1 to 3 points for the principal active stocks. There were one or two abortive rallies on occasional profit taking by bears, but they were not well held and the lowest prices of the day were touched during the final hour. There was a very substantial rally then, reaching from one to two points for many market leaders, due to the general covering of shorts to take profits on the day's decline, but the market became unsettled again and closed easy.

market became unsettled again and closed easy.

The practical abandonment of the Aldrich financial bill affected sentiment even at the opening, but vigorous supporting orders were distributed in the market and the decline was effectually checked. The vigorous upward movement in Manhattan was to this end. At this point the effect of the money situation became concrete by the calling of loans to a large extent by the banks. This forced considerable liquidation and the bears made successive drives against the market. The buying demand was so insignificant that the bear tactics were very effective and uncovered large stop orders.

market. The buying demand was so insignificant that the bear tactics were very effective and uncovered large stop orders.

The day's sub-treasury statement showed withdrawals from the market by that institution yesterday of \$1,681,000, bringing its absorption since Priday up to \$3,995,000. There seems to have been an awakening to the fact that last Saturday's bank statement understated the supply of cash by about one-half, so that the effect of last week's decrease on this week's bank statement will be correspondingly aggravated. The nominal decrease in loans shown by the bank statement is also doubled as a true showing of the week's operations, and yesterday's sale of \$16,000,000 St. Louis & Iron Mountain bonds, announced with another \$10,000,000 supposedly taken by other interests, is an indication of the continued heavy demand for credits.

It was believed that strong interests were liquidating in the stock market today and presumably taking losses, owing to the hopelessness of advanced prices at present, and the immediate requirement for funds to protect more interests elsewhere. The report of a stock brokerage failure in Boston was given a somewhat exaggerated significance by the connivance of the bears and was a material factor for a time in the weakness. The showing made by the railroads in the January reports of net erninags in proving a heavy disappointment, as confident hopes have been indulged that the increase in freight rates in January would result in largely offsetting the growth in operating expenses. Manhattan was well supported throughout and the declaration of the usual dividends caused a show of strength in Sugar. Reports of a strike on its lines east of St. Louis made the Wabash stocks conspicuously weak, but the news of the injunction against the labor men caused a particularly effective raily in these stocks. There were wide declines in a number of high grade seldom active stocks and the closing bid prices showed some still more notable recessions in stocks which were not dealt in. Bonds

GRAIN AND PROVISIONS.

Chicago, March 3.—Wheat ruled dult throughout the day and the volume of business was small. The early market was firm on strong Liverpool cables, the prices there being higher on bullish advices from India, showing a decrease in the exportable surplus. May opened a shade higher at 77% and the market became stronger as the session advanced, May selling up to 77%. Considerable liquidation occurred on the advance, but the market held fairly well until late in the day, when the break in corn caused a slump to 77%. The close was about steady, with May a shade lower at 77%.

Trading in corn was less active than that during the past few days, the demand from prominent longs being absent, but in spite of the quietness the market ruled strong until late in the day, when a sharp break occurred on liberal offerings. The close was easy, with May ½ clower at 47% 47%.

There was little trading in oats. May closed a shade lower at 334,035%.

There was little trading in oats. May closed a shade lower at 334,035%.

There was little trading in oats. May closed a shade lower at 334,035%.

The close was casy, with May ½ clower at 47% 47%.

There was little trading in oats. May closed a shade lower at 354,035%.

Some excitement was caused in the provision pit by the strong feeling displayed in lard early in the day and covering by shorts resulted in an advance of 22% cents in the price of that commodity, our part of the gain was lost on realizing sales. Pork opened at a sharp advance, but heavy realizing caused a deciding. Smaller receipts of hogs and high-

er prices at the yard, together with the light stocks were the bull factors. The close was steady with May pork 5 cents lower, lard 12½ cents higher and ribs 2½ The leading futures ranged as follows:

Wheat-No. 2: Corn-No. 2. | Open. | High. | Low. | Close . 47½ 47½ 47½ 47½ 47½ 45½ 45½ 45½ 45½ 45½

H. B. Cole Co., Stock Brokers. No. 16 West Second South. Tel. 325. J. Oberndorfer, Stock Broker, 161 South Main. Tel. 288. House, 1054-Y. FALLING HAIR STOPPED.

Baldness Cured by Destroying the Parasite Germ That Causes It. Baloness follows failing hair, failing hair, failing hair follows dandruff, and dandruff is the result of a germ digging its way into the scalp to the root of the hair where it saps the vitality of the hair. To destroy that germ is to prevent as well as cure dandruff, failing hair, and, lastly, baldness. There is only one preparation known to do that, Newbro's Herpleide, an entirely new, scientific discovery. Wherever it has been tried it has proven wonderfully successful. It can't be otherwise, because it utterly destroys the dandruff germ. "You destroy the cause, you remove the effect." Sold by leading drugsists. Send 10c in stamps for sample to the Herpicide Co., Detroit, Mich.

TO SNUFF VOLCANOES.

A STARTLING DISCOVERY MADE BY AN AUSTRALIAN. Volcanoes can easily be extinguished

zoicances can easily be extinguished, says the New York Herald. A New Zealand man claims (and there are many who agree with him) to have discovered a liquid by means of which volcances may be extinguished quickly whether active or threatening.

Many diseases of the human body act in the same manner or volcances. Discovering the same manner or volcances. in the same manner as volcanoes. Dyspepsia, Rheumatism, Kidney Disorders. Female Diseases and many others all begin with a slight rumble of pain and distress, and if not treated in time will burst forth in all their fury, causing all who are so afflicted the most interest suffering and making life.

ense suffering and making life a compete burden.

That a liquid has been discovered that will extinguish these volcanic eruptions of disease, whether active or threatening, is not only certain but a material fact.

DR. DAVID KENNEDY'S FAVOR-ITE REMEDY is this liquid discovery. THE WONDERFUL CURATIVE powers of this famous remedy have cut a new path through the field of medicine. sweeping with it a startling record of trement us success.

Druggists sell it in NEW 50-CENT SIZE and the regular \$1.00 size bottles. Sample bottle—enough for trial, free by mail
